

LIVE SURGERY · Monday, 4th October 2021

10:30 – 12:30, Plenary Room

Live Surgery – Latest Innovations in Minimally Invasive Surgery brought to you by Hologic for superior Women’s Healthcare Pathways and Outcomes

Hologic is a global leader in women’s health, dedicated to improving their clinical pathways and outcomes. We bring NEW solutions for Minimally Invasive Surgery, to See-and-Treat Heavy Menstrual Bleeding, in the OR or in the ambulatory setting, safely and efficiently. During this live surgery session, Dr David van der Ham will show the new Omni 30° hysteroscope and the new Fluent Fluid Management System, discussing how they improve the efficacy and safety of the MyoSure use, particularly in the ambulatory setting. Dr Vincent Villefranque will demonstrate the removal of RPOC, polyp and fibroid with MyoSure TRS. Dr Peggy Geomini will show a NovaSure RF endometrial ablation using the fundal block local anesthesia technique.
